Logistic services supplier (warehousing, fulfillment, transportation, and distribution)

GLC

Goldiran Logistics Company, as one of the strategic pillars of the Goldiran Group›s value chain, operating under the commercial brand GLC (Global Logistics Corridor), commenced its operations in November 2010. GLCs mission is developing and delivering on-time, secure, and competitive logistics services, as well as designing and implementing innovative, tech-based solutions in supply chain management. GLC aims to open a gateway to global logistics by relying on intelligent e-logistics management systems, mechanized warehouses equipped with cutting-edge technologies, and advanced hardware and software infrastructure. We provide all key supply chain processes from customs clearance to distribution and delivery to end-users at a national level and in full compliance with international standards.

We are determined to create value through the delivery of smart, efficient, and secure logistics services, standing as a reliable and sustainable partner alongside suppliers of goods and services and their customers.

We firmly believe that on this journey, we will be the best and the best will choose to partner with us.

Goldiran Logistics Co. leverages an extensive network of mechanized and smart warehouses throughout Iran to provide comprehensive supply chain management for all types of goods. Our warehouses, equipped with state-of-the-art technologies, international standards, and specialized teams, deliver secure, fast, and precise services.

7.Fulfillment

Picking, processing, packing, and shipping of goods.

8.Logistics and IT

These capabilities, position Goldiran Logistics Co. as a trusted and professional partner for suppliers and customers.

GLC

Intercity Transportation

Goldiran Logistics Co. utilizes a modern fleet and advanced intercity transportation infrastructure to enable fast, secure, and optimized movement of goods throughout the country. These services form a critical component of our integrated supply chain, playing a vital role in reducing delivery time, lowering costs, and enhancing customer satisfaction. Our core approach is to create added value for customers by minimizing delivery time while providing premium, tailored services of the highest quality. To this end, Goldiran Logistics Co. has established an extensive network of active branches at key strategic locations across the country, ensuring high capacity to meet domestic transportation needs

•Tehran Terminal (Main hub for domestic and intercity transportation)
•Qazvin Terminal (Strategic route for shipments to the northern and western regions of the country)
•Bandar Abbas - Shahid Rajaee Terminal (Key national center for transit, unloading, and loading operations)

Key Features of Intercity Transportation at GLC:

•Extensive Coverage: Intercity transportation services available from Tehran, Bandar Abbas, Chabahar, and Qazvin to destinations nationwide
•Modern and Diverse Fleet: Equipped with various specialized cargo vehicles
•Transportation Management System (TMS): Offering planning, precise fleet performance and shipment reporting
•Capability to Transport All Cargo Types: From raw materials and industrial parts to finished and sensitive products
•Full Integration with Warehouses and Fulfillment Centers
•On-Time Delivery: Leveraging an integrated, multimodal network with intelligent planning while ensuring cargo safety and integrity
•Competitive and Cost-Effective Pricing
• High Flexibility and Scalability: Rapid response to demand fluctuations and special projects

Intracity Distribution

In today's fast-paced age, when speed of decision-making and precision in execution determine competitive advantage, a seamless and reliable flow of goods between origins and destinations represents the most value-creating segment of the supply chain.

With extensive experience in managing logistics processes and a deep understanding of the diverse needs of industries across the country, Goldiran Logistics Co. is committed to provide intracity distribution not merely as a transportation operation, but as a strategic component of business optimization.

Through the integration of smart mechanized technologies, disciplined operational structures, and an agile, coordinated fleet, we have formed an efficient network for transferring goods from origin to destination a network that prioritizes accuracy, timing, and goods integrity.

02

Collection from Multiple

Pickup from manufacturers, importers, or warehousing centers while adhering to transportation and packaging standards

01

Optimized Route Planning

Reducing time and costs by utilizing advanced fleet management software (TMS)

04

Inventory Management and

Visibility into order status and shipment location

03

Diverse and Equipped Fleet

Diverse light vehicles designed for fast and precise delivery

06

Reverse Logistics

Managed return of defective or returned goods with full quality

05

Nationwide Smart

Scheduled and systematic delivery across the country

08

Support Services

Customer coordination, satisfaction surveys, and delivery confirmation (Proof of Delivery - POD)

07

Customized Services

Tailored solutions to meet specific client requirements
